Quality Testing and Engineering, Inc. (QTE) has an immediate opening for an experienced Construction Materials Testing Technician to perform testing of various materials, both in field and laboratory settings, to verify conformance to company and/or project specifications. Candidates must be reliable, responsible, and meet the requirements listed below. Candidates must be able to work varying hours, days, including some weekends, and at times over 8-hour shifts in order for us to meet our clients' needs.

Requirements:
- ACI Certification as a Concrete Field Grade Testing Technician -- Grade I (this can be obtained)
- Valid driver's license and reliable transportation to transport testing equipment
- Pass drug and alcohol screening
- General knowledge of MS Office including Word and Excel
- 1 year or more of concrete materials inspection/testing in the field or laboratory testing experience desired
- Must be able to work both inside and outside in varying weather, and be able pickup and carry at least 50 lbs

Nice to have experience with, but not required: Lightweight Concrete & aggregate testing.

Job Description/Duties:
Sampling and/or performing ASTM (American Society for Testing and Materials) testing on aggregates, cementitious materials, fresh concrete, and hardened concrete. Provide and receive training, recommend and make adjustments to concrete mix designs, report and share test results, and perform data entry.

Job entails traveling to the following sites primarily located in the Greater St. Louis Metropolitan Area to perform and/or conduct testing at construction jobsites, ready-mixed concrete plants, local laboratories, and company's laboratory.

QTE is an equal opportunity employer. Serious candidates should email résumés to Joe Carter jcarter@qteinc.com.
